

From Lumendo to Odne

Dübendorf, November 9, 2023 – Lumendo AG is thrilled to announce a pivotal change in our company's identity. Effective immediately, we have officially transitioned to Odne AG.

This change coincides with our imminent entry into the US market, signifying a strategic shift in our vision. Odne AG, formerly Lumendo AG, is poised to redefine endodontic treatments, turning ENDO into ODNE

Odne's CEO, Andreas Schmocker, shared his insights, stating: "The brand 'Oodne' perfectly encapsulates our unwavering commitment to excellence and innovation in the field of endodontics. It's a unique name, previously unused in the dental industry."

Simultaneously, we have relocated our registered office to Dübendorf, Switzerland, where our dedicated team focuses on research and development as well as operational excellence. Our new address is:

Odne AG
Ringstrasse 14
8600 Dübendorf
Switzerland

Visit our updated website www.Oodne.co to explore our transformed identity.

About Odne: Odne AG, formerly known as Lumendo AG, has its roots in a groundbreaking collaboration between two renowned Swiss institutions: The Swiss Federal Institutes of Technology in Lausanne and Zürich (EPFL & ETH Zürich). Founded in 2018, our journey began by licensing cutting-edge technology assets from these esteemed institutes.

Oodne AG represents a harmonious synergy of Swiss precision and academic excellence. Our company is committed to pioneering the future of endodontics through advanced technology and innovative solutions. Endodontics, the field of dental medicine that deals with root canal treatments, has been marred by complexity and unpredictability. Odne AG is on a mission to change that.

Root canal treatments have long posed challenges for dentists, with traditionally low success rates ranging from 46% to 91%. With over 60 million annual treatments worldwide, these failures result in significant healthcare costs.

Oodne's technology platform addresses these issues by offering treatment options for both dentists and their patients. Our products, slated for launch in 2024, tackle problems such as the obturation in complex morphologies.

Disclaimer: Odne's endodontic obturation material, OdneFill, is cleared for use in the U.S.A only. All other Odne devices are currently in development and have not received clinical approval in any jurisdiction.
